4.0	**Presentation by Julie Bolton on Integrated Outcomes Based Planning** Con Hogan (2001) stated that "no matter how effective, no one single programme or organisation can do it alone….problems are bigger than any one of us or our programmes…it takes contribution by all to make a difference that is measureable and positive." **What is Outcome based Planning?** Integrated Outcomes Based Planning is a process to enable policy makers, providers, planners and practitioners to work together with communities, families, children and young people to plan and deliver services. **Outcomes Based Planning Language:** **Outcome** An outcome is a condition of well-being for *all* children, adults, families or communities An outcome is expressed in universal, aspirational, positive terms and expressed in everyday understandable language e.g. "All children are ready for school." An outcome is NOT a statistical target. **Indicator** A measure which helps quantify the achievement of an outcome Rate of child death by suicide Rate Infant mortality Indicators allow us to measure the past and present and project the future. Indicators need to be grouped together to quantify an outcome. Indicators need to be comparable over time and geography but can be supplemented by localised information. The Locality Planning Group split into two small groups to work on the Outcome Based Planning- Services Template; **Disability-** Need feedback from parents through disability teams Transition – post schools options Utilising resources that are already there Social isolation for Young People with Physical sensory disability Volunteers to give 1-1 support Indicators not always available Young People and Mental Health Services for 16-25- Befriending/Mentoring	**Sub group to be set up to identify gap in services** **Disability Action** **Mencap** **Cedar** **If you are interested in being part of this sub group please contact Julie on 07725 232566**
