Overview of group discussions:

- CYPSP plan rests on a statutory obligation set out in the Children Order. It is important that members are involved in their local council community planning arrangements
- Concern was expressed about the number of strategies, partnerships and delivery mechanisms that impacted on children and young people and how they link and work together – how we will measure accountability with so many reporting structures was raised as an issue. Mr McCaughey asked if the same indicators were being used across all these strategies. He noted the potential for confusion if different measures are being used. He raised this as an issue for CYPSP-an alignment of indicators across the different strategies.
- Gaps between CYPSP structures (outcomes groups and locality planning groups) and new initiatives such as Fresh Start/ Urban Villages. Specific suggestion that CYPSP look at how it engages with delivery of Fresh Start recommendations relating to children and young people.
- Ms Turbitt noted that the relationship between the Community Plans and Making Life Better should be strong as this is the public health strategy.
- Agreed vision to build upon existing locality planning groups, outcomes groups, hubs and thematic working groups to ensure the needs of all children and young people are being addressed through influencing the community plans, new Children’s Strategy and new high-level outcomes
- Noted degrees of engagement between member organisations and development of community plans.
- Noted that it would take time for community planning to embed itself.

It is important to align funding opportunities where possible to support the delivery of better outcomes for children and young people.• Mr McCaughey, SEHSCT, noted that CYPSP members need to work to ensure that our structure should be embedded into community planning to support the prioritisation of children and young people’s issues. CYPSP also need to look at the community plans and how they link with CYPSP plans, CYPSP structures and our own organisations agenda’s to ensure we build upon CYPSPs collaborative working.• Ms Wilkinson raised the issue of engagement of children and young people in the development of the community plans. Liam Hannaway referred to the engagement work that the Council had undertaken with schools.• Members recognise that Councils have different approaches, thematic priorities and challenges – need to counterbalance investments for children and older people | |
