Home Accident Prevention

In Northern Ireland in a typical week, two people die as a result of home accidents. In addition to these deaths, there are approximately 17,000 admissions to hospital each year as a result of unintentional injuries in general.

The Southern Health and Social Care Trust's Promoting Wellbeing Division aim to provide information and resources to their staff and general public on home accidents and how to prevent them. The work is guided by the [Home Accident Prevention Strategy \(2015\)](#) and the aim is to minimise injuries and deaths caused by home accidents.
